

Entrepreneurship Development Cell

The cell fosters the development of entrepreneurial culture in ASOIT to encourage creative and innovative ideas and growth mindset amongst its students.

Objectives

- To create entrepreneurial culture in ASOIT
- To provide information on the various facets of enterprise building to promising entrepreneurs
- To encourage innovation driven entrepreneurship through students projects
- To stimulate development of science and technology based projects
- To boost employment opportunities in creative fields.

Activities

- Inviting leading entrepreneurs to share their expertise and experiences with students and staff.
- Setting up entrepreneurship related camps and programmes in the Institute.
- Creating and maintaining relevant data pool in close interaction with the GTU and other Universities & Research Organizations.
- Exposing the students on the need and importance of entrepreneurship as a viable career option.

Industry-Institute Interaction Cell (III Cell)

The Institute has given impetus in organizing technical events and industrial visits time and again to encourage Industry Academia Linkage. It has encouraged collaboration with the top companies to give industry exposure to its students. It also offers opportunities to its students to work with different companies on diverse entrepreneurial projects, giving them insights into the recent trends in vogue.
